

Jonas Augusto

BACKEND DEVELOPER | AUTOMATION & AI AGENTS | PYTHON · FASTAPI · ARTIFICIAL INTELLIGENCE

+55 32 99168-5954 | jonasaugustoprofissional@gmail.com | linkedin.com/in/jonasaaugusto | Juiz de Fora, Brazil | jonasaaugusto.github.io

SKILLS

Applied AI

Integration with OpenAI API, Anthropic, DeepSeek. LangChain, on-device Whisper AI, Prompt Engineering, LLMops. LLM agents, intelligent search orchestration. MCP (Model Context Protocol) integrations.

Backend & Frameworks

FastAPI, RESTful APIs, JWT, Webhooks. Automation with n8n, RPA, Playwright. Retry, fallback, and smart-cache patterns.

Databases

PostgreSQL, MySQL, SQLite, Supabase. Relational modeling, optimization, versioning.

DevOps & Infra

Docker, Docker Compose, Linux CLI, CI/CD. VPS, monitoring, Git/GitHub.

Architecture & Practices

Clean Architecture, SOLID, Design Patterns. TDD, retry patterns, robust error handling.

Languages

Python (focus), C#, SQL, JavaScript.

Other

.NET MAUI, UML, BPMN, Scrum, HTML/CSS.

EDUCATION

Software Engineering

Estácio de Sá | 2023 – Dec 2026 (completing)
GPA 9.3/10

Technical Degree, Software Dev.

SENAI Juiz de Fora | 2023
GPA 8.0/10

LANGUAGES

Portuguese Native
English C1 (Advanced)

CERTIFICATIONS

Completed

- Advanced Python + Generative AI (Udemy)
- Artificial Intelligence Specialist (Academia de IA)
- Information Systems Programming (Estácio)
- Web Programming (Estácio)
- User Rights & Privacy (Estácio)

In Progress

- AWS Cloud Practitioner (2026)
- Microsoft Certified: Azure Fundamentals (2026)
- AI & Machine Learning: Complete Guide (Udemy)
- Advanced FastAPI | TDD | PostgreSQL (Udemy)
- Power Apps + Power Automate + SharePoint (Udemy)

PROFESSIONAL SUMMARY

Backend Developer specialized in intelligent orchestration and automation pipelines. 6 months in real production: 15+ integrations, 97% latency reduction, 93.5% downtime reduction. I build agents with LLMs (OpenAI, DeepSeek, Anthropic), integrate legacy APIs, and optimize critical workflows. Clean Architecture, SOLID, retry patterns. Stack: Python, FastAPI, Docker, Supabase, n8n. Software Engineering (GPA 9.3, graduating Dec 2026). Portfolio: jonasaaugusto.github.io.

PROFESSIONAL EXPERIENCE

Development and Automation Intern

May 2026 – present · Remote

F5 Tecnologia

- Development of AI agents for selling digital products (loans, internet and cable TV plans), handling storage and traffic of sensitive data in compliance with LGPD.
- Integration with WhatsApp Business API and CRM systems via webhooks, with infrastructure monitoring and retry-pattern implementation.
- Flow analysis, validation testing, and technical documentation of AI systems.

Backend Development & RPA Intern

Sep – Nov 2025 · Hybrid

NEURODEV (Startup)

- Developed 15+ integrations in Python connecting external APIs, processing 800+ transactions per day.
- Implemented retry patterns and fallback with monitoring via Linux CLI for high availability.
- Optimized a pipeline with the OpenAI API, reducing latency from 15 minutes to 27 seconds (97% reduction) through prompt engineering and intelligent caching.

Junior Backend & Integration Developer

Aug – Sep 2025 · Remote

BNECT (Early-Stage Startup)

- Developed services in Python integrating CRM/ERP via APIs, applying Factory and Strategy patterns with an event-driven architecture.
- Used n8n and Python for workflow orchestration with LLM integration.

Software Requirements Analyst

Aug – Sep 2023 · Remote

Volpatto Engenharia (Freelance)

- Specified functional and non-functional requirements in UML/BPMN for 6 services, focusing on performance and maintainability.

FEATURED PROJECTS

Iaproveale Concurso Finder · Python / FastAPI / DeepSeek / MCP / Supabase

Backend with intelligent search orchestration using DeepSeek LLM and MCP to integrate with the PCI Concursos platform. JWT authentication, result deduplication, and versioned persistence in Supabase PostgreSQL. Desktop client in PySide6, web in development. Roughly 1,500 lines. Versioned deployment on Render. Demonstrates competence in AI agents and LLM integration in production.

NotaME · C# / .NET MAUI / SQLite / AES-256

Offline-first app for issuing NFS-e invoices (micro-entrepreneurs) with biometric authentication, AES-256 encryption, PDF generation via QuestPDF, and P2P sync over the local network, with zero server dependency.

LogiTrack API · Python / FastAPI / PostgreSQL / Docker

Logistics REST API with Clean Architecture, the Repository pattern, JWT authentication, async endpoints, and containerized deployment via Docker Compose.

VoxAI Hub · C# / .NET MAUI / Whisper AI / FFmpeg

Cross-platform app for offline audio/video transcription with on-device Whisper AI model integration, no external API cost, and full privacy.
