Jonas Augusto

FOUNDER OF AUGUSTUS AI SOLUTIONS | AI AGENTS · AUTOMATION & B2B WEB

(32) 99168-5954 | jonasaugustoprofissional@gmail.com | linkedin.com/in/jonasaaugusto | Juiz de Fora, MG | **jonasaaugusto.github.io**

SKILLS

Generative AI
DeepSeek (tool calling), OpenAI API, Anthropic Claude, Ollama (local LLM), WhisperX, pyannote, RAG (lexical and hybrid), MCP, guardrails, LLM agents.

Backend & Frameworks
FastAPI, Node.js and TypeScript (Fastify), REST APIs, WebSocket, Webhooks, Baileys (WhatsApp), BullMQ, Playwright, n8n, idempotency and retry.

Databases
PostgreSQL (pgvector), SQLite, Redis.

Infra & DevOps
Linux VPS (Ubuntu), systemd, Docker and Compose, GitHub Actions, nginx, SSH and tmux, restic and Backblaze B2, backup and restore.

Desktop & Front-End
.NET 10 and MAUI, MVVM, SSH.NET, xterm.js, PySide6, HTML/CSS/JS.

Languages
Python (focus), C#, TypeScript, JavaScript, SQL.

Quality & Methods
Automated testing (pytest, xUnit, Vitest), security and LGPD, Scrum, UML, BPMN, technical documentation.

EDUCATION

Software Engineering
Estácio de Sá | 2023 – Dec 2026 (expected)
GPA 9.3/10

Technical Degree, Software Dev.
SENAI Juiz de Fora | 2023
Avg. 8.0/10

LANGUAGES

Portuguese Native
English C1 (Advanced)

CERTIFICATIONS

Completed
- Advanced Python + Generative AI (Udemy)
- AI Specialist (Academia de IA)
- Information Systems Programming and Web Programming (Estácio)

In progress
- AWS Cloud Practitioner and Azure Fundamentals (2026)
- Advanced FastAPI | TDD | PostgreSQL (Udemy)

PROFESSIONAL PROFILE

Founder of Augustus AI Solutions, with a little over 1 year of professional experience. I deliver AI agents and automations that serve, sell and operate on WhatsApp for companies, plus internal apps and B2B web systems, always in production and with the infrastructure under my control (own VPS, monitored services, backup). I value low operating cost, documentation and tests that protect what already works. Software Engineering (GPA 9.3, graduating Dec 2026).

PROFESSIONAL EXPERIENCE

CEO & Lead Developer
Jun 2026 – present · Remote
Augustus AI Solutions · AI Agents, Automation & B2B Web

- **Raízes & Escamas** (aquarium store, real client): WhatsApp support and sales agent in TypeScript, Baileys and DeepSeek, with prices computed by rules in code, RAG over 430 product sheets, quotes with quantity guards and PIX. The owner registers products in batches through WhatsApp (text, audio and photo). Systemd service on my own VPS.
- **AugustusApp** (internal app): local meeting transcription, built-in SSH terminal for the VPS, modular WhatsApp connector, bot management and VPS backup administration.

Development and Automation Intern
May 2026 – present · Remote
F5 Tecnologia

- AI agents over WhatsApp for selling digital products (credit and energy) and for customer relationship and after-sales, with guardrails in code, partner and CRM (Blip) integrations, and sensitive data handled under LGPD.
- Fixed critical production failures (OCR, supplier identification, eligibility rules), unblocking 170+ customers.
- Reworked the CRM dashboard: first call from **73.7 s to 0.08 s** and **0 discrepancies in 1,960 items** checked against the portals.

Automation and RPA Support Intern
Sep – Nov 2025 · Hybrid
NEURODEV (Startup)

- 15+ Python integrations connecting external APIs, 800+ transactions per day, with retry patterns and fallback.
- OpenAI API pipeline: latency from 15 minutes to 27 seconds (-97%) via prompt engineering and caching; RPA refactored with Docker, monthly downtime from 35 h to 2.25 h (-93.5%).

Junior AI Automation Developer
Aug – Sep 2025 · Remote
BNECT (Early-Stage Startup)

- Python services integrating CRM/ERP via APIs (Factory and Strategy, event-driven architecture) and n8n flows with LLMs.

Software Requirements Analyst
Aug – Sep 2023 · Remote
Volpatto Engenharia (Freelance)

- Functional and non-functional requirements in UML/BPMN for 6 services.

FEATURED PROJECTS

AugustusApp · .NET 10 MAUI / Python / WhisperX / Ollama
Internal desktop app: VPS SSH terminal (xterm.js and tmux), 100% local transcription (WhisperX large-v3 with diarization, summary and next-meeting briefing with a local LLM, zero API cost), WhatsApp connector, bot management and VPS backup with restic to Backblaze B2. Local Python services tied to a Windows Job Object; 8 GB GPU with one owner at a time.

Modular WhatsApp Connector · Python / Baileys · B2B Product
Connects and disconnects WhatsApp bots by QR, with live log and each bot independent, registered in an editable file without recompiling. Keeps no session of its own, loopback-only service with token and 40 automated tests.

IAprovale Concurso Finder · Python / FastAPI / DeepSeek / MCP / PostgreSQL
AI search for public-service exams: natural-language queries are translated by DeepSeek and run against PCI Concursos via MCP (no scraping). ~200 tests, Playwright E2E, PySide6 and web clients, deployed on Render.
