

Jonas Augusto

Backend Developer | AI-Powered Process Automation

+55 32 99168-5954 | jonasaugustoprofissional@gmail.com | linkedin.com/in/jonasaaugusto | Juiz de Fora, Brazil | jonasaaugusto.github.io

97%	93.5%	15+
less latency in automated processes	less downtime in RPA	integrations in real production

KEY SKILLS

Python, FastAPI, C#, JavaScript, PostgreSQL, Supabase, Docker, n8n, Playwright (RPA), Anthropic Claude, OpenAI API, DeepSeek, Process Automation, Prompt Engineering, RESTful APIs, JWT, Webhooks, MCP, Clean Architecture, SOLID, CI/CD, Git/GitHub.

PROFILE

Backend Developer with hands-on experience in **AI-powered process automation** and systems integration. 10 months in real production: 15+ integrations, 97% latency reduction, 93.5% downtime reduction. I use LLMs (Claude, OpenAI, DeepSeek) as a tool within real automation pipelines, with Python, C#, FastAPI, and relational databases, applying Clean Architecture, SOLID, and retry patterns. Software Engineering (GPA 9.3, graduating Dec/2026).

AI PROCESS AUTOMATION

- AI-powered process automation:** using LLMs (Claude, OpenAI, DeepSeek) to automate real business decisions and flows via n8n and custom APIs.
- Systems integration:** connecting legacy APIs, CRM/ERP, and messaging channels via webhooks, with retry patterns and monitoring.
- RPA & orchestration:** automation with Playwright and n8n, reducing manual work and downtime.
- Performance optimization:** prompt engineering, caching, and architecture review to reduce latency in critical pipelines.
- Production reliability:** observability (structured logging, dashboards, alerts) and multi-VPS distributed architecture.

PROFESSIONAL EXPERIENCE

Development and Automation Intern — F5 Tecnologia May 2026 – present

- Built a 24/7 automated service system (state machine) integrating LLMs into real decision flows, with multi-VPS distributed architecture.
- Audited and fixed critical production failures (business rules, data integration), unblocking **170+ customers** wrongly denied.
- Integrated a financial partner API and messaging systems via webhooks; recovered **43 proposals** through an active monitoring job.
- Migrated infrastructure to a new VPS and built a tool server from scratch via the MCP protocol, giving the agent the ability to execute real actions with a safety lock against irreversible actions.

Backend Development & RPA Intern — NEURODEV Sep – Nov 2025

- Developed **15+ integrations** in Python connecting external APIs, processing **800+ transactions/day**.
- Refactored RPA with Docker (-93.5% downtime) and optimized an AI pipeline (-97% latency) via prompt engineering and caching.

Junior Backend & Integration Developer — BNECT Aug – Sep 2025

- Developed Python services for CRM/ERP integration (Factory/Strategy) orchestrated with n8n + LLMs.

Software Requirements Analyst — Volpatto Engenharia (Freelance) Aug – Sep 2023

- Specified functional and non-functional requirements in UML/BPMN for 6 services, reducing rework and standardizing processes.

FEATURED PROJECTS

IAprovale · Concurso Finder (Python/FastAPI/DeepSeek/MCP/PostgreSQL) — async backend with JWT, ~200 automated tests, and deployment on Render.

F5 Tecnologia Case — distributed 24/7 AI-powered automated service system, multi-VPS.

Fabula Coop (Python/LLM Agent) — cooperative real-time text RPG, with an AI acting as the campaign master.

LogiTrack API (Python/FastAPI/PostgreSQL/Docker) — Clean Architecture, JWT, containerized deployment via Docker Compose.

Other: **NotaME** (C#/ .NET MAUI, offline-first, AES-256) · **VoxAI** (on-device Whisper AI) · QR Code Generator · Discord Zombot.

TECHNICAL SKILLS

Applied AI: Anthropic Claude, OpenAI API, DeepSeek, MCP, Prompt Engineering, LLM-driven decision automation

Backend & Frameworks: FastAPI, RESTful APIs, JWT, Webhooks, n8n, Playwright (RPA)

Languages: Python (focus), C#, JavaScript, SQL

Databases: PostgreSQL, MySQL, SQLite, Supabase

DevOps & Infra: Docker, Docker Compose, systemd, Linux CLI, CI/CD, Git/GitHub

EDUCATION, LANGUAGES & CERTIFICATIONS

Software Engineering – Estácio de Sá | 2023 – Dec 2026 (completing) — GPA 9.3/10 · **Technical Degree, Software Development** – SENAI Juiz de Fora | 2023 — GPA 8.0/10 · **Languages:** Portuguese (Native), English (C1 Advanced)

Completed: Advanced Python + Generative AI (Udemy); Artificial Intelligence Specialist (Academia de IA); Information Systems Programming and Web Programming (Estácio); User Rights & Privacy (Estácio). **In Progress:** AWS Cloud Practitioner (2026); Microsoft Azure Fundamentals (2026); AI & Machine Learning: Complete Guide, Advanced FastAPI | TDD | PostgreSQL, Power Apps + Power Automate + SharePoint (Udemy).
