PROFESSIONAL SUMMARY

Founder of Augustus AI Solutions, with a little over 1 year of professional experience as an intern and freelancer. I deliver AI agents and automations that serve, sell and operate on WhatsApp for companies, plus internal apps and B2B web systems, always in production and with the infrastructure under my control (own VPS, monitored services, backup). I value low operating cost, documentation and tests that protect what already works. Software Engineering (GPA 9.3, graduating Dec 2026).

TECHNICAL SKILLS

Generative AI: RAG (lexical and hybrid), MCP, guardrails, DeepSeek (tool calling), OpenAI API, Anthropic Claude.
Backend and Frameworks: Webhooks, FastAPI, Node.js and TypeScript (Fastify), REST APIs, WebSocket.
Databases: PostgreSQL (pgvector), SQLite, Redis.
Infra and DevOps: Linux VPS (Ubuntu), systemd, Docker and Compose, GitHub Actions, nginx, SSH and tmux.
Desktop and Front-End: .NET 10 and MAUI, MVVM, SSH.NET, xterm.js, PySide6, HTML/CSS/JS.
Programming Languages: Python (focus), C#, TypeScript, JavaScript, SQL.
Quality and Methods: Automated testing (pytest, xUnit, Vitest), security and LGPD, Scrum, UML, BPMN.

PROFESSIONAL EXPERIENCE

CEO and Lead Developer | Augustus AI Solutions Jun 2026 - present | Remote

- Raízes & Escamas (aquarium store, real client): WhatsApp support and sales agent in TypeScript, Baileys and DeepSeek, with prices computed by rules in code, RAG over 430 product sheets, quotes with PIX and batch product registration through WhatsApp (text, audio and photo). Systemd service on my own VPS.
- Monobloco (client): custom commercial landing page built to present the offer clearly and turn visitors into leads, from briefing to production launch.
- AugustusApp (internal app): local meeting transcription, VPS SSH terminal, modular WhatsApp connector, bot management and VPS backup.

Development and Automation Intern | F5 Tecnologia May 2026 - present | Remote

- AI agents on WhatsApp selling credit and energy and handling after-sales, with guardrails in code, partner and CRM (Blip) integrations, and sensitive data handled under LGPD.
- Fixed critical production failures (OCR, supplier, eligibility rules): 170+ customers unblocked.
- Reworked CRM dashboard: first call from 73.7 s to 0.08 s and 0 discrepancies in 1,960 items checked against the portals.

Automation and RPA Support Intern | NEURODEV (Startup) Sep - Nov 2025 | Hybrid

- 15+ Python integrations with external APIs, 800+ transactions per day, retry and fallback.
- OpenAI API pipeline: latency from 15 minutes to 27 seconds (-97%) via prompt engineering and caching.
- RPA refactored with Docker: monthly downtime from 35 h to 2.25 h (-93.5%).

Junior AI Automation Developer | BNECT (Early-Stage Startup) Aug - Sep 2025 | Remote

- Python services integrating CRM/ERP via APIs (Factory and Strategy, event-driven) and n8n flows with LLMs.

Software Requirements Analyst | Volpatto Engenharia (Freelance) Aug - Sep 2023 | Remote

- Functional and non-functional requirements in UML/BPMN for 6 services.

PROJECTS

AugustusApp | .NET 10 MAUI / Python / WhisperX / Ollama
VPS SSH terminal (xterm.js and tmux), 100% local transcription (WhisperX large-v3 with diarization, summary and briefing with a local LLM, zero API cost), WhatsApp connector and VPS backup with restic to Backblaze B2.

Modular WhatsApp Connector | Python / Baileys / B2B Product
Connects and disconnects WhatsApp bots by QR, with live log and independent bots registered in an editable file without recompiling. Loopback-only service with token and 40 automated tests.

EDUCATION

Software Engineering - Estácio de Sá | 2023 - Dec 2026 (expected) | GPA 9.3/10
Technical Degree, Software Development - SENAI Juiz de Fora | 2023 | Avg. 8.0/10

LANGUAGES

Portuguese: native | English: C1 (Advanced)

CERTIFICATIONS

Completed: Advanced Python + Generative AI (Udemy); AI Specialist (Academia de IA); Information Systems Programming and Web Programming (Estácio).

In progress: AWS Cloud Practitioner and Azure Fundamentals (2026); Advanced FastAPI | TDD | PostgreSQL (Udemy).
